

# CHAMP A2ZScan

Leverage machine learning to automate the time-consuming document processing of Air Waybills

*CHAMP A2ZScan is revolutionizing the way we process Air Waybills, allowing for incredible time, cost, and error reduction for ground handling agents and airlines.*

## Benefits

- Avoid the average human error rate of 3%
- Achieve huge time savings of up to 85%
- Prevent delays to any air cargo shipments and generate cost savings
- Reduce 10-15 minute tasks to 2-3 minutes
- Save manhours spent training staff in data-heavy tasks
- Leverage Artificial Intelligence (AI) and Optical Character Recognition (OCR) technologies

With more than 60 million Air Waybills (AWBs) typed and compared by hand, CHAMP Cargosystems has launched CHAMPA2Z Scan to digitalize the processing of paper Air Waybills, reducing the average human error rate and generating time savings of up to 80%.

CHAMP A2Z Scan was designed to give airlines and ground handling agents (GHAs) the ability to bypass this time-consuming manual labour, instead uploading digital AWBs to a specially designed AI scanner, which turns the image into text and compares the data automatically.

CHAMP A2Z Scan leverages Artificial Intelligence (AI) and Optical Character Recognition (OCR) technologies which enable the accurate extraction of data from paper Air Waybills as well as allowing the system to learn from this data. As it grows, CHAMP A2Z Scan will be able to adopt and input corrections made by back-office agents to the documents, further reducing manhours spent amending errors.

Thanks to CHAMP's open cargo platform and leading Application Programming Interface (API) program, CHAMP A2Z Scan automatically looks up any corresponding AWB data in your cargo management system and automates the comparison between the two – highlighting any discrepancies for manual.

# Features

- Accurately track how many manual corrections are done and avoid revenue leakage
- Quick implementation thanks to APIs
- Integrates with Cargospot and third-party cargo management system
- User-intuitive interface allows for easy adoption
- Scalable solution with volume discounts available

## Digitalize and transform your Air Waybill processing with CHAMP A2Z Scan

The air cargo industry is currently undergoing significant digital transformation, powered by the availability and adoption of exciting new technologies. CHAMP has always been at the frontlines of digitalization and modernization in the air cargo industry, bringing you exciting and efficient software solutions such as CHAMP A2Z Scan.

With CHAMP A2Z Scan, you can leverage innovative and efficient software solutions that allow you to drastically reduce Air Waybill processing time, eliminate human error, automate manual tasks, and enjoy numerous efficiency gains.

Transform the way you process Air Waybills with CHAMP's A2Z Scan, and explore the benefits of next-level digitalization.

# Our Portfolio

CHAMP Cargosystems provides the most comprehensive range of integrated IT solutions and distribution services for the air cargo transport chain. Our portfolio spans Cargo Management Systems, messaging and integration services through our Community Integration Platform and a comprehensive suite of eCargo solutions. These include applications to meet customs and security requirements, quality optimization, as well as e-freight and mobility needs. The products and services are well known under the Cargospot and Traxon brands.

## About Us

CHAMP Cargosystems aims to maximize the efficiency and capacity of air cargo supply chain by providing a wide array of integrated IT solutions and distribution services. As of January 2022, it is a wholly owned subsidiary of SITA. CHAMP serves over 200 airlines and GSAs, and links these with some 4,000 forwarders and GHAs worldwide. Its solutions evolve with ever changing times to meet the needs of global transport logistics and facilitate trade.
